TSX / CGF International Oil and Gas Day December 11, 2024

PRESENTATION AGENDA

- THIS EARLY-STAGE NEW ENERGY SUPER CYCLE TAKE ADVANTAGE OF THE DIPS - CORRECTIONS
- THE BENEFITS BEING A SCHACHTER ENERGY RESEARCH SUBSCRIBER
- CLOSING COMMENTS AND THANK YOU'S

HOW HIGH CAN THE ENERGY CYCLE GO

THE REASONS FOR A LENGTHY ENERGY BULL MARKET INTO LATER THIS DECADE ARE:

- 1. Lack of capital investment in the energy sector to replace declines
- 2. Demand for fossil fuels in countries providing metals for energy transition will more than offset OECD climate change demand decline (lithium, copper, nickel and rare earths)
- 3. Disciplined energy sector not 'drill baby drill' mentality

HOW HIGH CAN THE ENERGY CYCLE GO

THE REASONS FOR A LENGTHY ENERGY BULL MARKET INTO LATER THIS DECADE ARE:

- 4. At market peak energy stocks can trade over 8x cash flow (now around 2-3x).

 Many energy stocks could go up 5x over the next 5+ years
- 5. OPEC cannot increase production materially without significant capital most use proceeds to fund government spending and consumer subsidies
- 6. War Issues: Ukraine, Middle East And Fear Of War Against Taiwan Can Spike Energy Prices

HOW HIGH CAN THE ENERGY CYCLE GO

THE REASONS FOR A LENGTHY ENERGY BULL MARKET INTO LATER THIS DECADE ARE:

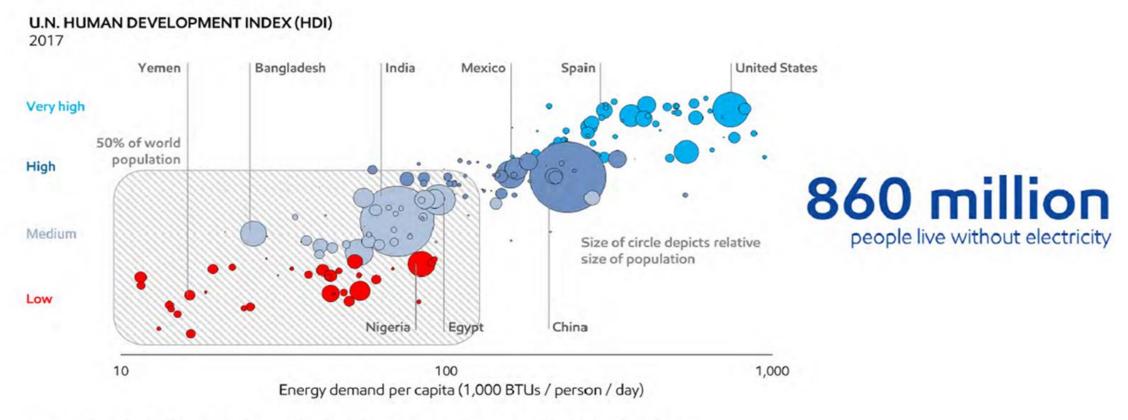

- 7. We see a price for WTI over US\$150/b (A new all-time high) in the later part of the decade
- 8. We see the sustained price for AECO natural gas after 2H/25 of over C\$3/mcf (winter spikes could go over C\$6/mcf)
- SPX/TSX Energy Index Should Exceed The ALL TIME HIGH OF 470 Seen May
 2008 (close at 277 on Tuesday, October 15, 2024)

Current Energy Supplies Essential For Growth Of Renewables

Living standards improve with greater access to energy

- Access to affordable and reliable energy is essential for progress
- · Half the world's population live in countries that rank low to medium on the U.N.'s HDI

Breakeven Prices For New US Wells

Breakeven Prices for New Wells

In the top two areas in which your firm is active, what WTI oil price does your firm need to profitably drill a new well?

NOTES: Line shows the average, and bars show the range of responses. 87 E&P firms answered this question from March 13-21, 2024. SOURCE: Federal Reserve Bank of Dallas.

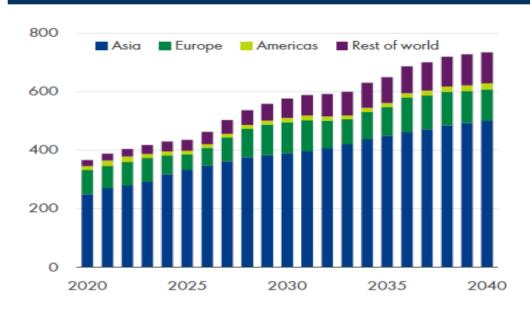

NATURAL GAS OUTLOOK - WILL GLOBAL SUPPLY MEET LNG DEMAND?

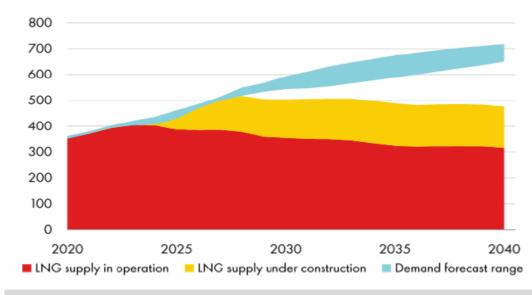

Global LNG Demand (Billion Cubic Meters)(1)

Demand for LNG continues to climb, particularly in Asia, with over 43 countries now importing LNG, from only 23 ten years ago.

LNG Supply-Demand Gap (Billion Cubic Meters)(2)

Forecasted demand for LNG is creating opportunity for Canada and U.S. LNG projects as a supply deficiency is projected to start in 2027.

NATURAL GAS OUTLOOK - CANADIAN LNG

LNG Canada is a 2.0 bcf/d LNG export facility that represents one of the largest energy investments in Canadian history. It is a joint venture company comprised of five global energy companies- Shell, PETRONAS, PetroChina, Mitsubishi Corporation and KOGAS.

LNG Canada Woodfibre LNG Westcoast Station 2 Hub

Woodfibre LNG is a 0.3 bcf/d liquefied natural gas (LNG) export facility with seven bcf of floating storage capacity being built near Squamish, BC. The project is jointly owned by Enbridge Inc. and Pacific Energy Corporation Ltd. It is expected to be online in 2027.

It takes 10 days to ship LNG from Canada's West Coast to Asia, compared to 24 days from the U.S. Gulf Coast. LNG Canada's GHG emissions profile is projected to be 32% lower than the world's currently best-performing liquefaction plants(2), and Woodfibre LNG plans to be the first LNG export facility in the world to achieve net zero emissions (3).

SCHACHTER ENERGY REPORT

- Market Overview
- Oil and Gas Industry Updates Cross Currents Affecting Energy Prices (Weekly Eye On Energy Report)
- Geo-Political Impacts
- Insider Trading Reports (Next one early Jan/25)
- 37 Company Coverage Profiles and Company Coverage Lists.
 Quarterly Reviews Of All Companies Covered Balance Of Evidence
- SER Coverage, Valuation, Recommendation, BUY/SELL and SER Ownership Lists each issue
- Quarterly Webinars Last one was November 28, 2024 (Available in our archives).
- Early Access With Complimentary Passes To 2025 'Catch The Energy' Conference.

SEPTEMBER 10, 2024

TODAY'S S&P / TSX: 253 WTI: US\$66.23/B

To Our Subscribers:

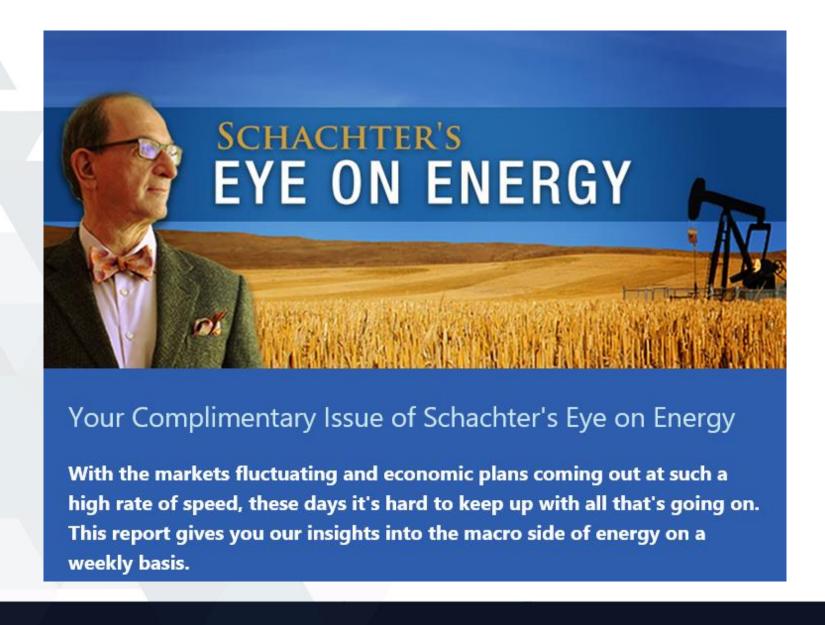

• One of our three Energy BUY signals was the price of WTI breaching US\$70/b. It reached an intraday low so far of US\$66.03/b today. Crude should see bottoming action in the US\$66-US\$69/b range.

- Lake Lake
- We are adding five new investment ideas today.
- We are re-iterating BUYS on three ideas on the current BUY List that are at bargain levels.
